NOVEMBER

OCTOBER RECAP

After a full month of adapting to the new virtual learning experience, students are starting to participate more and more in class bonding events.

Although an in person spirit week could not be easily emulated, the virtual spirit week committee organized a "Viking Week" with different fun activities everyday throughout the week. One of the most popular events that all classes have widely engaged in was the "Paly Search" in which QR codes were randomly located the city of Palo Alto, and students could go search for the QR codes in order to increase their chances of winning a raffle. This event not only allowed for friendly competitions between Paly students, but also encouraged them to get outside and explore the city.

Another event that was hosted in October was the ASB Fishbowl. This event was unexpectedly joined by many staff members, including the Paly principal Mr. Kline. In the event, many interesting ideas were brought up and executed such as the "Zoom Open Hours" and the "Cohorts on Campus" both of which students can freely socialize despite the lack of interaction in class.

Lastly, different themed contests were hosted, and students from different classes were allowed to share their creativity through a virtual and safe environment. For example, towards the beginning of October, a mask decorating competition was hosted, and throughout the week of Halloween, a Halloween costume contest was hosted.

ASB CHECK-IN

TRANSPARENCY REGARDING REOPENING

- Q&A's for students that are confused about the possible proposals
- Consider the student body's preferences
- Constantly update the student body with new information or plans
